January 2018

Dear fellow Orofacial Myologist,

Sandra's video demonstrations are essential for understanding how to execute and model each orofacial myology exercises. The problem I found was that finding the specific exercise I needed to view or model was often hard to locate on the single video provided with the course. So, I completed the very time consuming task of editing the video into separate clips for each exercise. By paying a small fee, you are acknowledging the time I have spent on this and the time Im saving you! This link is for a single user only. Please do not share with others. Should you have other colleagues who might find this also helpful, please have them follow the same steps to purchase the link as you did.

I sincerely hope you find these helpful in your practise.

Please click the link below to access the dropbox file containing Sandra Coulson's videos segmented into individual exercises.
